	<i>Weekly or bi-weekly Telehealth sessions</i>	<i>Monthly or bi-Monthly Telehealth sessions</i>	<i>As needed Telehealth sessions and messaging</i>

WHY PROCEED WITH THIS REFERRAL?

DrLullaby’s clinicians specialize in treating insomnia - including cases with unique needs, complex medical problems, and severe symptoms. They utilize Cognitive Behavioral Treatment for Insomnia (CBT-I), which the American Academy of Sleep Medicine and the American College of Physicians, recommend as the first-line treatment for your challenges.

CBT-I includes behavioral interventions - well-beyond sleep hygiene - not just turning off your screens and stopping coffee early in the day! They teach strategies to get better control over thoughts and emotions keeping you awake and identify behavior patterns interfering with your sleep.

DrLullaby assigns you a sleep schedule based on data kept during treatment, and collaborating with you on your preferences. Through your clinicians' analysis of your sleep data tracked, they'll be able to help support decreased insomnia. They can take you through sleep medication tapering, and support CPAP use for those where it's helpful or wanted. They use innovative, high-tech options to keep you engaged!
